

October 10 2006

I was asked to test a new EPS-1 Nano-Fuel Technology product on my 2001 Subaru Forrester. My car is an all wheel drive and has a 2.5 Liter engine. My mileage was not very good at that time and any type of mileage improvement would be more than welcome, especially with the cost Of gas. I brought my vehicle to my local mechanic and he installed the EPS-1 in my car in about 15 to 20 minutes. After installation, I started my car and after a few minutes I could feel that my car was running smoother. When I left the garage and was driving on the highway I then noticed an increase in power as well.

Prior to the installation of the EPS-1 I was getting 18.7 mpg.  
After my first fill up my mpg improved to 19.8 mpg.  
On my second fill up my mpg improved to 22.6 mpg. Now I was very happy. On my third fill up my mpg improved once again to 23.0 mpg.  
To date I have had a 23% increase in mpg, not to mention the money I am saving. The installation of the EPS-1 is one of the best products I have ever purchased and installed on my car.

Today my car is running like a charm and I cant wait to fill up again to see if my mpg will increase again

Thank You

Sincerely  
Carol Francoeur
